

# TXTR-LITE™

Flexible Stone Veneer™

## APPLICATION

TXTR-LITE™ can be applied to many surfaces, including: concrete, ceramic, wood, metal, plywood, fiberglass, backer board, tile, dry wall, MDF and Masonite®. Before application it is best to clean, scuff, brush and degrease any surface of dust or oils. In some installations, depending on the adhesive used, it may be necessary to prep the back of TXTR-LITE with solvent or recommended primer by the adhesive manufacturer.

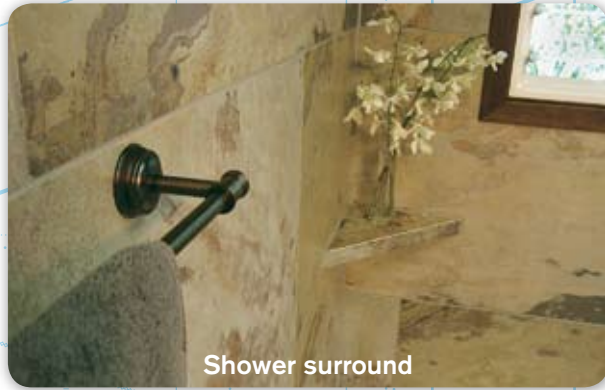

## CUTTING...EDGE

TXTR-LITE can be cut with hand sheers, wet or dry abrasive saws, water jet and carbide or diamond tools. Corners can be sanded with power or hand sanders to finish edges. As with any cutting or sanding the use of proper safety masks, eye goggles and ventilation should be used at all times.

## RECOMMENDED ADHESIVES

- Premixed grout and tile adhesive
- Acrylic copolymer based tile adhesive
- Polyurethane and wood glues
- Silicone (with primer only)
- Thick latex type adhesives (use only where air drying can take place)
- Epoxy
- Silicone (with primer only)
- Construction grade multi-purpose adhesive
- Polyester based gap filler putty

Polyurethane construction adhesives work quite well for most applications to board materials by foaming slightly to fill gaps. These adhesives are not recommended for high moisture or wet applications. Please contact our technical department for questions about recommended adhesives and applications.

## WHAT IS TXTR-LITE?

TXTR-LITE™ is a flexible stone veneer made of various types of laminated stones that can be applied to many different surfaces indoors or out. TXTR-LITE can be used in various environments proving to be a superb material where a lightweight real stone finish is desired. Because it is made from thin layers of real stone, it has the look and feel of real stone. TXTR-LITE is a time and labor saving product that does not require all of the standard masonry tools or methods.

## APPLICATIONS

- Architectural
- Interior & Exterior
- Doors & Cabinets
- Furniture
- Trim & Backsplashes
- Marine & RV
- Kitchens
- Bathrooms
- Flooring
- Signage

## SIZING

Standard sheet size is 2' x 4' (61 cm x 122 cm) with a 1mm to 5 mm thickness. Larger sheet sizes may be available. Each sheet is different as every piece consists of a paper thin layer of real stone.

## GREEN & SUSTAINABLE

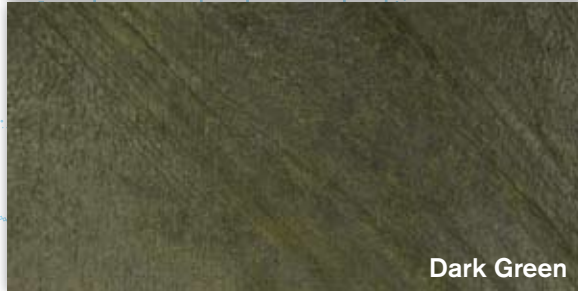

Design Green with TXTR-LITE. Because TXTR-LITE is extremely lightweight fuel is saved in shipping and handling when compared to standard stone or tile products. There are additional savings in packaging materials used for transport, as well. TXTR-LITE is also a sustainable product by utilizing only what is needed from the stone quarry. Because of the unique manufacturing process, each sheet of TXTR-LITE represents just a small amount of the natural stone, not the whole slab.
